PAGES

Lipid Absorption and Metabolism: Physiological and Molecular Aspects *(Symposium Proceedings: 11–14 July 1995)*

Chairman's introduction. *D. Lairon* 1–3

Regulation of lumen fat digestion: enzymic aspects. *Robert Verger, Mustapha Aoubala, Frédéric Carrière, Stéphane Ransac, Liliane Dupuis, Josiane de Caro, Francine Ferrato, Isabelle Douchet, René Laugier & Alain de Caro* 5–18

Cellular and molecular aspects of fat metabolism in the small intestine. *Philippe Besnard, Isabelle Niot, Andre Bernard & Helene Carlier* 19–37

Lipid absorption and hepatic metabolism in ruminants. *Dominique Bauchart, Dominique Gruffat & Denys Durand* 39–47

The scientific rationale and clinical application of short-chain fatty acids and medium-chain triacylglycerols. *Omaida C. Velázquez, Renée W. Seto & John L. Rombeau* 49–78

Disposition of lipids in the postprandial state. *Christine M. Williams* 79–91

Adipocyte hormone-sensitive lipase: a major regulator of lipid metabolism. *Dominique Langin, Cecilia Holm & Max Lafontan* 93–109

Interactions between adipose tissue and the immune system. *Caroline M. Pond* 111–126

Effects of fatty acids and dietary lipids on cells of the immune system. *Philip C. Calder* 127–150

Fatty acids and expression of lipid-related genes in adipose cells. *Gérard Ailhaud, Ez-Zoubir Amri & Paul-André Grimaldi* 151–154

The Nutrition Society 1995 Medal Lecture *(Symposium Proceedings: 11–14 July 1995)*

A solution to the problem of predicting the response of an animal to its diet. *Ilias Kyriazakis* 155–166

Glucose Transporters in the Control of Metabolism *(Symposium Proceedings: 11–14 July 1995)*

Intestinal sodium-dependent D-glucose co-transporter: dietary regulation. *Soraya P. Shirazi-Beechey* 167–178

Hormonal regulation of the insulin-responsive glucose transporter, GLUT4: some recent advances. *Callum Livingstone, Fiona J. Thomson, Margaret I. Arbuckle, Ian W. Campbell, Thomas J. Jess, Susan Kane, Colin Moyes, Lisa M. Porter, Jacqueline E. Rice, Michael J. Seatter & Gwyn W. Gould* 179–190

Over-expression of GLUT4 selectively in adipose tissue in transgenic mice: implications for nutrient partitioning. *Luigi Gnudi, Peter R. Shepherd & Barbara B. Kahn* 191–199
Differential regulation of the fructose transporters GLUT2 and GLUT5 in the intestinal cell line Caco-2. *Edith Brot-Laroche* 201–208
Glucose transporters in the brain. *D. V. Rayner* 209–219
Facilitative glucose transporters in ruminants. *Jean-François Hocquette, Michele Balage & Pascal Ferré* 221–236
Glucose transporters in obesity. *Michèle Guerre-Millo* 237–244

Regulation of Gastrointestinal Secretion *(Symposium Proceedings: 11–14 July 1995)*

Regulation of gastrointestinal secretion: symposium overview. *G. J. Dockray* 247–249
Control of gastric secretion. *Michael E. Parsons* 251–258
Recent aspects of the regulation of intestinal mucus secretion. *C. Laboisse, A. Jarry, J. E. Branka, D. Merlin, C. Bou-Hanna & G. Vallette* 259–264
Molecular control of peptide hormone and receptor expression. *Rod Dimaline* 265–277
Intestinal adaptation to nutritional stress. *Francis Raul & René Schleiffer* 279–289
Nutrient-induced secretion and metabolic effects of glucose-dependent insulinotropic polypeptide and glucagon-like peptide-1. *J. M. E. Knapper, L. M. Morgan & J. M. Fletcher* 291–305
Neural integration of tissue and whole-animal regulation of digestive secretions. *Claude Rozé* 307–317

Adolescent Nutrition: Are we Doing Enough? *(Symposium Proceedings: 11–14 July 1995)*

Adolescent nutritional status in developing countries. *Kathleen M. Kurz* 321–331
Adolescent Kingston girls' school achievement: nutrition, health and social factors. *Susan P. Walker, Sally Grantham-McGregor, John H. Himes & Sonia Williams* 333–343
Influences on adolescent food choice. *Richard Shepherd & Catherine M. Dennison* 345–357
Anaemia in adolescent girls: effects on cognitive function and activity. *M. Nelson* 359–367

Physiologically-Active Substances in Plant Foods *(Symposium Proceedings: 11–14 July 1995)*

Physiologically-active compounds in plant foods: an overview. *M. J. C. Rhodes* 371–384
Epidemiological evidence on potential health properties of flavonoids. *Michaël G. L. Hertog* 385–397
Physiological effects of phyto-oestrogens in relation to cancer and other human health risks. *Aedin Cassidy* 399–417

Polyamines in human health. *Heather M. Wallace* 419–431
Glucosinolates in Brassica: occurrence and significance as cancer-modulating agents. *Wim M. F. Jongen* 433–446

The Glucostatic Theory of Hunger and Satiety: Where are we Now? *(Symposium Proceedings: 11–14 July 1995)*

Carbohydrate balance and body-weight regulation. *J. P. Flatt* 449–465
Dietary macronutrients and glucostatic control of feeding. *R. James Stubbs* 467–483
Glucostatic control of intake and obesity. *Arne Astrup & Anne Raben* 485–495
Metabolic and glucostatic control of feeding. *Wolfgang Langhans* 497–515

Regulatory Factors in the Control of Development and Maturation *(Symposium Proceedings: 11–14 July 1995)*

Aspects of gut development. *Charles Shaw-Smith & Nicholas A. Wright* 519–527
Lung maturation. *Robert Hume, Christine Conner & Mhairi Gilmour* 529–542
Regulatory factors in the control of muscle development. *M. J. Dauncey & R. S. Gilmour* 543–559
Influence of thyroid hormones and temperature on adipose tissue development and lung maturation. *Michael E. Symonds & Lynne Clarke* 561–569

Workshop on Molecular Biological Techniques in Nutritional Science *(Symposium Proceedings: 11–14 July 1995)*

Chairmen's introduction. *Paul Trayhurn & John K. Chesters* 573
Gene cloning: studies of nutritional regulation of gene expression. *John E. Hesketh & Kristine Partridge* 575–581
Northern blotting. *Paul Trayhurn* 583–589
Southern blotting. *Kevin F. Kelly* 591–597
Polymerase chain reaction. *John K. Chesters* 599–604
DNA sequencing. *W. D. Rees* 605–612
Transgenic animals. *Kevin Docherty* 613–618

International Committee of the Nutrition Society (ICONS) Workshop Report *(Symposium Proceedings: 11–14 July 1995)*

Nutrition information and support for overseas members. *Jackie Landman & Ann Burgess* 619–620

The Lord Boyd Orr Memorial Lecture *(Symposium Proceedings: 11–14 July 1995)*

Within a decade no child will go to bed hungry? *John B. Mason* 621–640

Nutritional Assessment and Surveillance: Implications for Food Policy Session 1: Current Issues in Nutrition Policy *(Symposium Proceedings: 6–8 September 1995)*

Food and nutrition policy in the Republic of Ireland: where to from here? *Emer Shelley* 641–647
Consumption implications of agri-food policies. *Bruce Traill & Spencer Henson* 649–659
Nutrition policy: priorities for new research. *M. J. Gibney* 661–669

Session 2: Are we Measuring What we Intend to Measure? *(Symposium Proceedings: 6–8 September 1995)*

Different techniques of food preparation and cooking: implication for dietary surveys. *I. Lena M. Bergström* 671–678
Clinical assessment in primary care: professional cooperation. *Vivien Reid* 679–688

Session 3: Nutritional Surveillance: Its Contribution to Food Policy *(Symposium Proceedings: 6–8 September 1995)*

Nutrition surveillance in Ireland. *Cecily Kelleher & Sharon Friel* 689–697
Integration of nutritional data based on household budget surveys in European countries. *A. Trichopoulou, A. Kanellou, P. Lagiou, E. Zintzaras & The DAFNE I Group* 699–704
Nutrition assessment and dietary guidelines: experience from the Dutch Nutrition Surveillance System. *Michiel R. H. Löwik, Karin F. A. M. Hulshof, Jantine H. Brussaard & Henny A. M. Brants* 705–723

Workshop on Measurement of Energy Expenditure *(Symposium Proceedings: 7 November 1995)*

Report of Macronutrient Metabolism Group Workshop. *Eileen R. Gibney & Fiona E. Leahy* 725–736

Sir David Cuthbertson Medal Lecture *(Symposium Proceedings: 5–7 December 1995)*

Immunomodulatory and anti-inflammatory effects of *n*-3 polyunsaturated fatty acids. *Philip C. Calder* 737–774

Workshop of the Stratford Executive Group *(Symposium Proceedings: 15/16 November 1995)*

Nutrition in the undergraduate medical curriculum. *A. A. Jackson (convener) on behalf of the Stratford Executive Group* 775–781

Predisposition to Obesity: Metabolic and/or Behavioural Factors, Symposium 1 *(Symposium Proceedings: 7 February 1996)*

New insights into the development of obesity: obese genes and the leptin system. *Paul Trayhurn* 783–791
The role of altered sympathetic nervous system activity in the pathogenesis of obesity. *Eric Ravussin & Pietro Antonio Tataranni* 793–802
Eating behaviour, food preferences and dietary intake in relation to obesity and body-weight status. *David J. Mela* 803–816

Symposium 2 *(Symposium Proceedings: 7 February 1996)*

Defects in substrate oxidation involved in the predisposition to obesity. *Arne Astrup, Benjamin Buemann, Søren Toubro & Anne Raben* 817–828
The role of lifestyle in health: the epidemiology and consequences of inactivity. *William H. Dietz* 829–840

Nutrition in Clinical Management: Malnutrition in our Midst *(Symposium Proceedings: 23 February 1996)*

Screening for nutritional risk. *H. M. Reilly* 841–853
The management of malnutrition in hospital. *Simon P. Allison* 855–862

The Nutritional Consequences of Complex Carbohydrates, Symposium 1 *(Symposium Proceedings: 2/3 April 1996)*

The analysis of complex carbohydrates: relevance of values obtained *in vitro*. *M. M.-J. Champ* 863–880
A physico-chemical perspective of plant polysaccharides in relation to glucose absorption, insulin secretion and the entero-insular axis. *Peter R. Ellis, Phillippa Rayment & Qi Wang* 881–898

Symposium 2 *(Symposium Proceedings: 2/3 April 1996)*

Fermentation of non-digestible oligosaccharides by human colonic bacteria. *Glenn R. Gibson, Anne Willems, Sally Reading & M. David Collins* 899–912
Anaerobic fungi in the digestive tract of mammalian herbivores and their potential for exploitation. *Michael K. Theodorou, Georgina Mennim, David R. Davies, Wei-Yun Zhu, Anthony P. J. Trinci & Jayne L. Brookman* 913–926

Symposium 3 *(Symposium Proceedings: 2/3 April 1996)*

The use of ^{14}C-labelled substrates to study plant cell wall breakdown in the gastrointestinal tract. *Callum J. Buchanan, Stephen C. Fry & Martin A. Eastwood* 927–936

The role of butyrate in human colonic epithelial cells: an energy source or inducer of differentiation and apoptosis? *Angela Hague, Alison J. Butt & Christos Paraskeva* 937–943

CNMG Guest Lecture *(Symposium Proceedings: 5–7 December 1995)*

The role of antioxidants in nutritional support. *Peter Fürst* 945–961

ABSTRACTS OF COMMUNICATIONS

10–14 July 1995

Food consumption patterns and misclassification of total fat intake of individuals. *A. D. Carver & A. E. De Looy* 2A

Investigation of the action of a preload of incorporated or added fat on appetite ratings and food consumption. *A. Santangelo & N. W. Read* 3A

Macronutrients, appetite and day-to-day food intake in humans. *A. M. Johnstone, R. J. Stubbs & C. G. Harbron* 4A

The gastrointestinal handling and metabolic disposal of [1-^{13}C]palmitic acid in patients with cystic fibrosis. *J. L. Murphy, A. E. Jones, R. H. Treneer, A. Hounslow, B. Zorich & S. A. Wootton* 5A

The gastrointestinal handling and metabolic disposal of [1-^{13}C]palmitic acid in normal, healthy children. *A. E. Jones, R. H. Treneer, J. L. Murphy & S. A. Wootton* 6A

Comparisons of metabolic responses to digestible and partly indigestible starches in healthy humans. *L. Achour, B. Flourié, F. Briet, C. Franchisseur, F. Bornet, J. C. Rambaud & B. Messing* 7A

Measurement of unabsorbed dietary carbohydrates and their fermentation products following the ingestion of ^{13}C carbohydrates in patients with malabsorption syndrome. *F. Briet, B. Flourié, L. Achour, M. Maurel, J. C. Rambaud & B. Messing* 8A

Hyperosmolality of apple juice is not the main factor which promotes water secretion in the intact human jejunum. *J. B. Leiper, F. Brouns & R. J. Maughan* 9A

An epidemiological investigation into the influence of diet on bone mass. *Susan A. New, Caroline Bolton-Smith, David A. Grubb & David M. Reid* 10A

A study of bone growth in adolescent girls: the effect of an 18-month, milk-based dietary intervention. *J. Cadogan, R. Eastell, N. Jones & M. Barker* 11A

Effects of dietary and non-dietary factors on bone metabolism in women. *Susan A. New, Simon P. Robins, Mark J. Garton, James C. Martin, David A. Grubb, Caroline Bolton-Smith, Susan J. Lee & David M. Reid* 12A

Sources of iodine in the vegan diet. *H. J. Lightowler & G. J. Davies* 13A

Adjustment of the expression of digestive enzymes to casein level in food in *Penaeus vannamei* (Crustacea, Decapoda). *Alain van-Wormhoudt, Gilles Le Moullac, Birgit Klein & Daniel Sellos* 14A

Production by the intestinal cell line HT29 cl.19A of arachidonic acid 5-lipoxygenase metabolites and their effect on electrogenic chloride secretion. *S. Battu, G. Clement, J. M. Wal, J. Cook-Moreau, J. L. Beneytout & J. F. Desjeux* 15A
Expression of fatty-acid-binding-proteins (FABP) along the small intestine in mice: effects of a high-fat diet and fatty acids. *H. Poirier, I. Niot, A. Bernard, H. Carlier & P. Besnard* 16A
Effect of glucocorticoids on the fatty-acid-binding protein (FABP) expression in rat liver. *L. Foucaud, I. Niot, T. Kanda, A. Mallordy, H. Carlier & P. Besnard* 17A
Lipoprotein lipase activity and gene expression in heart and skeletal muscles in the preruminant calf. *B. Graulet, J. F. Hocquette & D. Bauchart* 18A
Effects of fasting and refeeding on lipoprotein lipase and GLUT4 gene expression in tissues of lean and genetically obese (*ob/ob*) mice. *A. Nestor & P. Trayhurn* 19A
Effects of exercise training with food selection on GLUT4 glucose transporter expression in insulin-sensitive tissues in the rat. *N. Rieth, M. Guerre-Millo & C. Larue-Achagiotis* 20A
Variations in GLUT4 protein content among bovine adipose tissues. *J. F. Hocquette, C. Castiglia, P. Ferré & M. Vermorel* 21A
Inhibition of glucose transport and lipogenesis in rat adipose tissue by activation of β3-adrenergic receptors. *D. Langin, G. Enrique-Tarancon, E. Lopez-Soriano, X. Testar, M. Lafontan & C. Carpéné* 22A
Administration of an anti-adipocyte monoclonal antibody to piglets: effects on adipose tissue development and lipid content. *L. De Clerq, J. Mourot, C. Genart, C. Boone, G. Mineur & C. Remacle* 23A
Cyclic AMP modulates adipogenesis in 3T3-F442A cells. *Stephen J. Yarwood, Neil G. Anderson & Elaine Kilgour* 24A
Regulation of ovine preadipocyte differentiation *in vitro*. *K. S. Adams, D. J. Flint, A. Cryer & R. G. Vernon* 25A
Regulation of the antilipolytic effect of adenosine in sheep adipose tissue by growth hormone. *R. Doris, E. Kilgour, M. D. Houslay & R. G. Vernon* 26A
Nutritional regulation of the expression of the *ob* (obese) gene in white adipose tissue of mice. *D. V. Rayner, M. E. A. Thomas, J. S. Duncan & P. Trayhurn* 27A
Elevated expression of the *ob* (obese) gene in white adipose tissue of diabetic (*db/db*) mice. *P. Trayhurn, M. E. A. Thomas, J. S. Duncan & D. V. Rayner* 28A
Altered macrophage GTPase activity may not exclusively modify TNF-induced macrophage IL1 or IL6 production. *P. S. Tappia, R. L. Dunn & R. F. Grimble* 29A
Zinc deficiency inhibits the differentiation of F9 embryonal carcinoma cells. *W. D. Rees, Susan M. Hay & J. K. Chesters* 30A
Control of selenoprotein synthesis during selenium repletion of selenium-deficient rats. *Giovanna Bermano, Fergus Nicol, John A. Dyer, Roger A. Sunde, Geoffrey J. Beckett, John R. Arthur & John E. Hesketh* 31A
Thyroid selenoenzyme activity and mRNA abundance in second generation selenium and iodine deficient rats. *J. H. Mitchell, F. Nicol, G. J. Beckett & J. R. Arthur* 32A
Antioxidant supplementation decreases both endogenous and induced oxidative DNA damage in human lymphocytes. *Susan J. Duthie, Aiguo Ma, Marion A.*

Ross, Victoria L. Dobson, Katrina M. Brown & Andrew R. Collins 33A
A method of transfecting C_2C_{12} myoblasts at all stages of differentiation. *Fiona E. Fairhurst, Linda Petrie & John K. Chesters* 34A
The stability of mRNA encoding some pancreatic hydrolases is modulated by dietary protein intake in the rat. *S. Carreira, C. Fueri, J.-C. Chaix & A. Puigserver* 35A
Application of a new method for the measurement of circulating peptides. *Maria Hipólito-Reis, Dana Wilson, John C. MacRae & F. R. Colette Backwell* 36A
Transfer of ^{15}N from urea to the circulating lysine pool in the human infant. *N. Yeboah, E. Ah-Sing, A. Badalloo, T. Forrester, A. Jackson & D. J. Millward* 37A
Metabolism of lactose-ureide labelled with ^{15}N and ^{13}C in humans. *R. Bundy, A. Hounslow, C. Persaud, J. Murphy, S. A. Wootton & A. A. Jackson* 38A
Regulation of ammonia and amino acid metabolism in isolated sheep hepatocytes. *M. A. Lomax, S. A. Maltby, D. S. Buss & G. E. Lobley* 39A
Sepsis-induced long-lasting stimulation of liver protein synthesis. *Denis Breuillé, Catherine Allazard, Francis Rosé, Maurice Arnal & Christiane Obled* 40A
Effect of dietary proteins on the meal stimulation of albumin synthesis in humans. Relations with the precursor pool for protein synthesis. *Marc Cayol, Bernard Beaufrère, Pierre Gachon & Christiane Obled* 41A
Estimation of the enrichment of urea N precursors. *G. D. Milano, M. A. Lomax & G. E. Lobley* 42A
The influence of sulphur amino acids on urea-nitrogen salvage. *T. S. Meakins & A. A. Jackson* 43A
Altered insulin response to a glucose load in rats following exposure to a low-protein diet *in utero*. *C. L. Pickard, H. D. McCarthy, R. F. Browne & A. A. Jackson* 44A
Effect of a maternal diet low in protein on glucocorticoid-sensitive brain enzyme activities. *D. S. Gardner, S. C. Langley-Evans & A. A. Jackson* 45A
Effect of methionine addition to a high-protein diet on growth and energy utilization in the rat. *A. Ghusain-Choueiri & C. J. K. Henry* 46A
Effect of food restriction on protein metabolism in obesity treated by gastric bypass surgery. *J. M. Hibbert, D. C. Gore, J. N. Clore, H. J. Sugerman & L. Wolfe* 47A
The effect of weaning practice on fermentation capacity in breast-fed babies. *A. M. Parrett, E. Lokerse & C. A. Edwards* 48A
Colonic fermentation capacity is reduced in children with cystic fibrosis. *A. M. Parrett, D. Clark, K. Logan, N. Morton, T. J. Evans & C. A. Edwards* 49A
Is the ileostomist a good model for studies of starch digestion in man? *M. D. Robertson, J. C. Mathers, V. Mishra & G. Livesey* 50A
Dietary zinc prevents intestinal dysfunction in malnourished milk-sensitized guinea-pigs. *N. Darmon, M. A. Pelissier, P. Chappuis, C. Candalh, M. A. Blaton, R. Albrecht, J. F. Desjeux & M. Heyman* 51A
How the fatty acid composition of previous high-fat diets affects lipid absorption in rats. *P. Degrace, C. Caselli, E. Mianowski, I. Niot, A. Bernard & H. Carlier* 52A
Intestinal metabolism of α-linolenic acid during its absorption in the rat and mouse. *A. Bernard, C. Caselli, V. Okraszewski, P. Besnard, J. P. Blond & H. Carlier* 53A

Dose–response effects of dietary carrageenan (from *Eucheuma cottonii*) on blood lipids and gut tissues of rats. *C. S. Roper, W. Bal & J. C. Mathers* 54A
Comparative gastrointestinal responses to guar gum and a seaweed polysaccharide (sodium alginate) in rats. *C. J. Seal & J. C. Mathers* 55A
Modulated role of proteolytic enzymes in the digestion of food proteins. *L. Savoie, K. Arvaniti, L. Gignac & N. Mercier* 56A
Glutamine utilization by the healthy rabbit intestinal epithelium, *in vitro*, using [^{14}C]- and [^{15}N]glutamine. *R. N. Mazumder, S. K. Nath, M. Rongier, D. Darmaun & J. F. Desjeux* 57A
Endogenous nitrogen and amino acid flow in the terminal ilium of preruminant calves fed on skimmed milk, soluble wheat and soyabean isolate proteins. *G. H. Tolman & G. M. Beelen* 58A
Digestion of maize starch and native pea starch in the small intestine of pigs. *H. Everts, R. A. Dekker, B. Smits & J. W. Cone* 59A
Portal appearance of glucose and amino acids in the pig after feeding maize starch and native pea starch. *J. Van Der Meulen, J. G. M. Bakker, B. Smits & H. De Visser* 60A
Inter-animal variability in the energy expenditure of splanchnic tissues in preruminant calves. *I. Ortigues, D. Durand & D. Bauchart* 61A
Volatile fatty acid absorption and water flux in the rumen of sheep in relation to the volatile fatty acid supply. *S. Lopez & F. D. DeB. Hovell* 62A
Comparison of apparent absorption of essential amino acids from the small intestine and their net flux across the mesenteric and portal drained viscera of lambs. *John C. MacRae, Les A. Bruce, David S. Brown & David A. H. Farningham* 63A
Rat serum HDL_2-HDL_3 compositions are not affected by the consumption of different gluten intakes whereas lecithin-cholesterol-acyl-transferase activity is altered. *S. Senouci, M. Y. Lamri, D. Ait-Yahia, M. Meghelli-Bouchenak & J. Belleville* 64A
Taurine metabolism in cats fed on commercial canned or dry foods. *O. P. Ballevre, F. Montigon, J. Vuichoud, K. Johnston, S. Marti & L. B. Fay* 65A
Number and affinity of subcutaneous insulin receptors during growth in Large White and Meishan pigs. *M. Camara & J. Mourot* 66A
Urea kinetics in healthy pregnant women eating habitual and 60 g protein diets. *I. McClelland, C. Persaud & A. A. Jackson* 67A
Nitrogen or protein intake and urinary 5-oxoproline excretion in adults. *C. Persaud, T. Meakins, R. Bundy & A. A. Jackson* 68A
Factors influencing postprandial protein utilization in adults and the elderly. *A. Fereday, N. Gibson, M. Cox, D. Halliday, P. J. Pacy & D. J. Millward* 69A
VLDL binding by isolated hepatocytes in rats fed on animal or vegetable protein diets (100, 200 or 300 g casein or soyabean proteins/kg). *J. Prost, M. Narce, S. Peyron & J. Belleville* 70A
Postprandial serum promoted cholesterol efflux depends on fatty acid composition of the oral load. *Sana Sakr, Claude Senault, Dominique Vacher, Nathalie Fournier, Malika Haourigui, Nicolas Gausseres & Anik Girard-Globa* 71A

Gastric lipase activity is modulated by dietary fat intake in human subjects. *M. Armand, M. Hamosh, J. S. Dipalma, J. Gallagher, S. B. Benjamin, J. R. Philpott, P. Hamosh & D. Lairon* 72A
Effects of *n*-3 polyunsaturated fatty acids on lipid storage-related enzymes in adipose tissue of sucrose-fed insulin resistant rats. *A. Quignard-Boulange, S. Fluteau-Nadler, S. W. Rizkalla, B. Ardouin, M. Kabir, J. Luo & G. Slama* 73A
Provision of Asian foods in hospital. *P. C. McGlone, J. W. T. Dickerson & G. J. Davies* 74A
Comparison of a food-frequency questionnaire with a 4 d weighed record in South Asians. *N. A. Karim & B. M. Margetts* 75A
Changing dietary intake: a plate model approach. *A. S. Anderson & M. E. J. Lean* 76A
Undertaking dietary change: perceptions of ten dietary changes. *M. M. Raats, P. Sparks, M. A. Geekie & R. Shepherd* 77A
Changes over seven years in dietary patterns in the Health and Lifestyle Survey population. *M. J. Whichelow & A. T. Prevost*
Comparison of dietary assessment methods for energy and fat in a group of young and middle-aged men. *D. Webb, J. Knapper, H. Jordan, C. C. Culverwell, C. Kessel, J. A. Tredger & C. M. Williams* 78A
The use of *n*-3 polyunsaturated fatty acid-enriched foods in a dietary intervention study of middle-aged men. *C. Pike, J. A. Lovegrove, M. C. Murphy & C. M. Williams* 79A
Weight and length of Glasgow infants compared with Tanner and Whitehouse standards and new British standards for growth. *S. A. H. Savage, J. J. Reilly & J. V. G. A. Durnin* 80A 81A
Comparison of weight and height based indices for assessment of the risk of death in severely malnourished children. *C. Prudhon, A. Briend, D. Laurier, I. Y. Mary & M. H. N. Golden* 82A
Use of the waist:height ratio to assess the risks of obesity. *M. A. Ashwell, S. R. E. Lejeune & K. McPherson* 83A
The relationship between arm-span and height in different ethnic groups. *S. L. Reeves, C. Varakamin & C. J. K. Henry* 84A
Predicting body composition in adults. *Thang S. Han, Paul Deurenberg & Michael E. J. Lean* 85A
Prediction of limb muscle mass in men over 75 years of age. *N. J. Fuller, M. A. Laskey, P. Paxton & M. Elia* 86A
A comparison of saliva and plasma ascorbic acid. *Thomas K. K. Ha, Josephine Cooney & Michael E. J. Lean* 87A
Measurement of stable isotope [^{13}C]ascorbate using gas chromatography with mass spectrometry (GCMS). *A. P. Izzard, L. J. C. Bluck & C. J. Bates* 88A
The effect of ascorbate loading on ascorbyl radical formation in patients with sepsis and healthy subjects. *H. F. Goode, M. J. Davies & N. R. Webster* 89A
Are high fetal vitamin C concentrations due to placental synthesis? *A. Loban, A. T. Gibson & H. J. Powers* 90A
Superoxide dismutase activity in sixty nine premature babies from birth over the first week of life. *K. M. Silvers, A. T. Gibson & H. J. Powers* 91A
Erythrocyte lipid peroxidation in smokers compared with non-smokers: dose response of vitamin E supplementation. *K. M. Brown & G. G. Duthie* 92A

Plasma concentrations of carotenoids and antioxidant vitamins in smokers and non-smokers. *Marion A. Ross, L. Katie Crosley, Susan J. Duthie, Katrina M. Brown, Andrew R. Collins, John R. Arthur & Garry G. Duthie* 93A

Differential susceptibility of respiratory chain enzymes and lipids to peroxidation in liver mitochondria: use of compounds generating free radicals within aqueous or hydrophobic regions. *F. Beauseigneur, M. Goubern, J. Gresti, M.-F. Chapey, M. Tsoko, J. Demarquoy & P. Clouet* 94A

The quantification of non-transferrin-bound iron in plasma samples from neonates, using high performance liquid chromatography. *R. A. Kime, A. T. Gibson & H. J. Powers* 95A

The effects of riboflavin depletion and repletion on the structure and cytokinetics of the small intestine. *P. A. Aryee, E. A. Williams, R. D. E. Rumsey & H. J. Powers* 96A

Cellular and humoral immune responses in soyabean protein fed preruminant calves. *G. H. Tolman, S. Spanhaak, A. T. J. Bianchi, R. Zwart & E. Van Engelen* 97A

Concentrations of serum cortisol, insulin and glucagon in young calves before and after receiving propionate orally. *J. A. Nikolić, H. A. Šamanc, Z. Damjanović, M. Ratković, B. Radojičić & J. Begović.* 98A

Effects of some alterations in diets for weaned piglets on serum thyroid hormone and IGF-I concentrations. *J. A. Nikolić, B. Živković, G. Kostić & D. Stojanović* 99A

Responses in milk constituent secretion to intravascular administration of two mixtures of amino acids in dairy cows. *J. A. Metcalf, L. A. Crompton, D. Wray-Cahen, M. A. Lomax, B. J. Bequette, J. C. MacRae, F. R. C. Backwell, G. E. Lobley, J. D. Sutton & D. E. Beever* 100A

Effect of growth hormone administration on growth rate and plasma IGF-1 in milk- and solid-fed lambs. *K. Kamil, J. J. Gate, L. A. Crompton, M. J. Bryant & M. A. Lomax* 101A

The effects of meal frequency on postprandial plasma glucose tolerance, glucose dependent insulinotropic polypeptide and insulin concentrations. *C. Hallett, S. G. Isherwood, L. M. Morgan, J. A. Lovegrove & M. C. Murphy* 102A

Post-weaning dietary manipulation reduces blood pressure in rats with hypertension of fetal origin. *C. L. Pickard, M. K. Devoto & H. D. McCarthy* 103A

The effects of environmental temperature and photoperiod on the body composition and properties of the pelt in the Djungarian hamster, *Phodopus campbelli. D. A. Sadler & C. M. Pond* 104A

Animal or vegetable protein intakes (100, 200 or 300 casein or soyabean proteins/kg) differentially alter plasma distribution of cholesterol and triacylglycerols in rats. *J. Prost & J. Belleville* 105A

Effect of animal or vegetable protein intakes (100, 200 or 300 g casein or soyabean proteins/kg) on VLDL, HDL and apolipoproteins in the rat. *J. Prost & J. Belleville* 106A

Limitation of the hypertrophy of adipose tissues by fish-oil *n*-3 fatty acids during high-fat feeding in the rat: eicosapentaenoic acid *v.* docosahexaenoic acid. *R. Groscolas, T. Raclot, E. Mioskowski, H. Oudart, A. C. Bach & I. Minello* 107A

Effects of eicosapentaenoic acid and docosahexaenoic acid alone or in combination on plasma lipids and hepatic fatty acid oxidation in rats fed on high-fat diets. *R. Groscolas, C. Leray, E. Mioskowski, T. Raclot & A. C. Bach* 108A

Involvement of brown adipose tissue in the limiting effect of *n*-3 polyunsaturated fatty acids on obesity induced by a high-fat diet in the rat. *H. Oudart, R. Groscolas, C. Calgari & A. Malan* 109A
Size and clearance of chylomicrons after different fat loads in young women. *Nebil Attia, Sana Sakr, Jean-Louis Paul, Theophile Soni & Anik Girard-Globa* 110A
Detection of enriched [1-^{13}C]palmitic acid in human stool samples by gas chromatography-isotope ratio mass spectrometry. *M. Stolinski, J. L. Murphy & S. A. Wootton* 111A
A specific enzyme-linked immunosorbent assay for the measurement of apolipoprotein B-48 in triacylglycerol-rich lipoproteins. *K. G. Jackson, J. A. Lovegrove, A. Zampelas, A. Kafatos, M. Kapsokefalou, C. M. Williams & B. J. Gould* 112A
Potentially atherogenic chylomicron remnants are present in the low-density lipoprotein fraction as detected by a specific antibody to apolipoprotein B-48. *S. G. Isherwood, B. A. Griffin, C. M. Williams & B. J. Gould* 113A
Placental transfer of fatty acids from the maternal to the fetal circulation studied in the perfused human placenta. *P. Haggarty, K. Page, D. Abramovich, J. Ashton & D. Brown* 114A
Liver and adipose tissue stearoyl-CoA desaturase activity in the growing Meishan pig. *M. Kouba & J. Mourot* 115A
The organisation of adipose tissue surrounding lymph nodes in guinea-pigs and methods of studying local interactions between adipose and lymphoid tissue. *C. A. Mattacks & C. M. Pond* 116A
The effect of dietary lipid manipulation upon fuel utilization by rat lymphocytes. *N. M. Jeffery, P. Yaqoob, P. C. Calder & E. A. Newsholme* 117A
The influence of triiodothyronine and/or noradrenaline on perirenal adipose tissue composition in lambs delivered near to term by Caesarean section. *J. A. Bird, S. J. Lyke, M. A. Lomax & M. E. Symonds* 118A
Factors influencing final consumption of fruit and vegetables in Scotland: some preliminary results. *Maria G. Piacentini, Pamela Turner, Terry Kirk & Richard C. Prentice* 119A
'Fruit instead of cakes?': an evaluation of a fat-lowering dietary intervention. *M. E. Barker, K. Ogden & H. J. Powers* 120A
Consumption of cakes, biscuits and confectionery by British schoolchildren: association with nutrient intakes. *Sigrid A. Gibson* 121A
Relationship of biscuit, cake and confectionery consumption to body mass index and energy intake in Scottish women. *Susan A. New & David A. Grubb* 122A
Low sugar intakes are associated with high body mass index in the Dietary and Nutritional Survey of British Adults. *Sigrid A. Gibson* 123A
The effect of sucrose- and aspartame-sweetened drinks on energy intake, hunger and food choice of female, slightly restrained eaters. *J. H. Lavin, N. W. Read & S. J. French* 124A
Response to weight-reducing diets including and excluding sucrose as a sweetener. *J. A. West & A. E. De Looy* 125A
Energy expenditure during heavy work and its interaction with body weight. *P. Haggarty, M. E. Valencia, G. McNeill, N. L. Gonzalez, S. Y. Moya, A. Pinelli, L. Quihui, M. S. Saucedo, J. Esparsa, J. Ashton & E. Milne* 126A

First measurements of resting metabolic rate (RMR), diet-induced thermogenesis (DIT) and respiratory quotient (RQ) in lithium-treated patients. *R. A. Holt & E. M. W. Maunder* 127A
The metabolic disposal of [1-^{13}C]ethanol in relation to habitual ethanol consumption in healthy men. *J. S. Kathuria, J. L. Murphy & S. A. Wootton* 128A
Energy expenditure of adult cats estimated using the doubly-labelled-water method, indirect calorimetry and activity monitoring. *O. P. Ballevre, J. Ambrose, C. Piguet, H. Schierbeek & F. Chauffard* 129A
A comparison of potential energy supply from smallholder production with population's energy requirement in Malawi. *M. O. Mpoma, B. M. Margetts & A. A. Jackson* 130A
The effects of ambient temperature on substrate utilization during prolonged moderate intensity exercise in man. *S. D. R. Galloway & R. J. Maughan* 131A
Resting metabolic rate and excess weight gain during maintenance chemotherapy for childhood acute lymphoblastic leukaemia. *J. J. Reilly, C. J. Blacklock, I. Odame, M. Donaldson & B. E. S. Gibson* 132A
Negative energy balance in patients hospitalized with exacerbation of chronic obstructive lung disease. *M. K. Sridhar, S. W. Banham & M. E. J. Lean* 133A
The effects of alterations in dietary carbohydrate intake on running performance during a 10 km treadmill time trial. *Y. P. Pitsiladis, C. Duignan & R. J. Maughan* 134A
Intra individual variation in the basal metabolic rate of women: the effect of the menstrual cycle. *Vickie Curtis, E. Birch & C. J. K. Henry* 135A
Basal metabolic rate (BMR) in pre-adolescent and adolescent children. *Sarah Dyer, C. J. K. Henry & A. Ghusain-Choueiri* 136A
Weight loss and factor VIIc activity in overweight subjects. *Catherine R. Hankey, Anne Rumley, Gordon D. O. Lowe & Michael E. J. Lean* 137A
Coronary heart disease mortality in Peninsular Malaysia. *S. Mohd-Yusof & B. M. Margetts* 138A
Nutrition in the medical undergraduate curriculum. *M. E. J. Lean* 139A

2–5 August 1994

Body mass index characteristics of elderly slum dwellers in Bombay. *M. C. Marlow, P. S. Anklesaria & S. Ismail* 141A
Does iron consumption protect against anaemia in pregnancy? *O. O. Ejidokun, A. M. Tomkins, I. Akinsete, O. F. Giwa-Osagie & B. M. Afolabi* 142A

5–7 December 1995

Nutrition screening of acute in-patients. *Carolyn Davison & Irene Stables* 144A
A comparison between oral and nasogastric nutritional supplements in malnourished patients. *Janet P. McWhirter & Christopher R. Pennington* 145A
A prospective study of nutritional changes and of gastrostomy feeding in motor neurone disease. *Anastasios Gazis, Jo K. Rawlings, Simon P. Allison & David Jefferson* 146A
A randomized comparison of percutaneous endoscopic gastrostomy feeding and nasogastric tube feeding following acute dysphagic stroke. *Bernard Norton,*

Brian McKaig, Stuart A. Booth, Christopher B. Gornall, Richard G. Long & Geoffrey K. T. Holmes 147A
Minimal enteral feeding promotes gallbladder contractility in neonates. *G. Jawaheer, N. J. Shaw, D. A. Lloyd & A. Pierro* 148A
Nights of bright lights and noisy pumps: home parenteral feeding. *D. Carter, C. Wheatley, R. Martin, S. Foley, C. Porrett, J. Nightingale, A. Micklewright, G. McHattie, L. Paul & M. Lee* 149A
Micronutrient deficiency in a home parenteral nutrition programme. *G. Forbes, A. U. Jawhari, L. Fielding, S. Magnay, S. Wood & A. Forbes* 150A
Comparison of constant infusion and flooding methods for measuring muscle protein synthesis: effect of conventional total parenteral nutrition. *I. Tjader, P. Essen, J. Wernerman, M. A. McNurlan, P. J. Garlick, K. Smith & M. J. Rennie* 151A
The flooding-dose effect on the incorporation of constantly infused tracer leucine into skeletal muscle: studies with phenylalanine, threonine and arginine. *K. Smith, N. Reynolds, S. Downie & M. J. Rennie* 152A
A comparison of methods for measuring changes in fat-free mass in patients with the acquired immune deficiency syndrome. *N. I. J. Paton, D. C. Macallan, S. A. Jebb, C. Noble, C. Baldwin, M. Pazianas & G. E. Griffin* 153A
Measurement of total energy expenditure in patients with human immunodeficiency virus infection using the bicarbonate-urea method. *N. I. J. Paton, M. Elia, S. A Jebb, G. Jennings, D. C. Macallan & G. E. Griffin* 154A
The effect of inhibiting gluconeogenesis on protein synthesis in cachetic tumour-bearing rats. *O. A. Obeid & P. W. Emery* 155A
Lymphocyte function may influence the inflammatory and metabolic response to tumour necrosis factor and endotoxins in humans. *David B. Gough, Kenneth C. Fearon & David C. Carter* 156A
Impairment of interleukin-2 production and increased spontaneous tumour necrosis factor production by peripheral blood mononuclear cells may facilitate an exaggerated response to circulating endotoxins in humans. *David B. Gough, Kenneth C. Fearon & David C. Carter* 157A
Survival of intensive care patients given glutamine-supplemented parenteral nutrition: a double-blind, randomized treatment study. *Richard D. Griffiths, Christina Jones & T. E. Allan Palmer* 158A
Effects of fish oil, olive oil and maize oil on the metabolic responses to turpentine-induced inflammation in the rat. *S. S. Iqbal, M. M. SH. Duwaihy, R. A. Al-Shagrawi & D. J. Millward* 159A
Dietary lipids affect the sensitivity of rat thymic lymphocytes to glucocorticoids. *P. Yaqoob & P. C. Calder* 160A
The effect of dietary fibre upon rat peripheral blood lymphocyte proliferation. *P. C. Calder, C. Felippe, L. F. B. P. Costa-Rosa & R. Curi* 161A
Rapid entry of dietary fatty acids into the plasma non-esterified fatty acid pool. *Barbara A. Fielding, Keith N. Frayn, David Halliday, Peter A. Bannister, Joanne Callow & Soundararajan Venkatesan* 162A
Microdialysis of adipose tissue to assess the effects of adrenaline infusion. *J. S. Samra, E. J. Simpson, C. D. Forster, M. L. Clark, S. M. Humphreys, I. A. Macdonald & K. N. Frayn* 163A

Influence of variation in dietary fatty acid composition on von Willebrand's factor concentration in healthy men. *Francesca Oakley, T. A. B. Sanders & J. D. Pearson* 164A
The influence of palm oil and palm-oil fractions on protein utilization in the rat. *C. J. K. Henry, A. Ghusain-Choueiri & M. I. Gurr* 165A
The effect of varying the *n*-6:*n*-3 fatty acid ratio of the diet upon blood lipid concentrations in the rat. *N. M. Jeffrey, E. A. Newsholme & P. C. Calder* 166A
The effects of anaesthesia (Halothane & Chloroform) on postprandial glycogen and lipid synthesis in rats. *P. M. C. Ho, O. A. Obeid & P. W. Emery* 167A
The effect of age on the utilization of infused glucose studied using the hyperglycaemic glucose clamp. *Ceri J. Green, I. T. Campbell & D. P. M. McLaren* 168A
Acute effects of high-sucrose v. high-starch diets on insulin sensitivity in healthy volunteers. *M. Daly, C. Vale, A. Littlefield, M. Walker, K. G. G. M. Alberti & J. C. Mathers* 169A
The effect of acute Acipimox administration on the contribution of different pathways to postprandial glycogen synthesis in cachetic tumour-bearing rats. *O. A. Obeid, J. D. Bell & P. W. Emery* 170A
Acute augmentation of postprandial lipaemia by fructose. *Arefaine Abraha, Sandy M. Humphreys & Keith N. Frayn* 171A
Glutaminase (EC 3.5.1.2) and glutamine synthetase (EC 6.3.1.2) activities in the gastrointestinal tract of humans. *L. A. James, P. G. Lunn, M. Elia, J. O. Hunter, G. Neale & S. Middleton* 172A
Influence of *n*-3 fatty acids on postprandial lipaemia and factor VII coagulant activity. *Najat Yahia & T. A. B. Sanders* 173A
Long-term effects of restriction of dietary protein during pregnancy and/or lactation on the growth of the organs of the gastrointestinal tract. *L. T. Weaver M. Desai, S. Austin, A. Lucas & C. N. Hales* 174A
Management of malnutrition in the elderly: a clinical audit. *Johan W. Rademaker, Cheryl Richards, Judy Marsham, Joe Wheeler, Pat Batty, Jenny Summerell & Helen Williams* 175A
Percutaneous endoscopic gastrostomy for stroke: increasing or evolving? *Judy Potter, Vicki Potts, Elaine Speirs, Bijal Pavagadhi & John Meyrick Thomas* 176A
A cost utility analysis of home parenteral nutrition. *D. M. Richards, J. L. Shaffer & Sir Miles Irving* 177A
Long-term glucose homeostasis in patients on home parenteral nutrition. *Nigel Williams, Shona Wales, Anne Bradley, Don Barber, Jon Shaffer & Miles Irving* 178A
Recent trends towards reducing energy prescription in parenteral nutrition patients: implications for clinical practice. *Eileen Manning, Peter Turner & Alan Shenkin* 179A
Factors affecting nutrition in early cystic fibrosis: resting energy expenditure, pulmonary inflammatory markers, body composition and genotype in a neonatally-screened population. *M. Thomson, R. Greer, B. Masters, G. Cleghorn, R. Wilmott, P. J. Francis & R. W. Shepherd* 180A
Screening for malnutrition in oncology patients. *R. Moore, J. A. Kramer, M. Elia & S. A. Jebb* 181A

Survival of patients with metastatic colorectal cancer correlates with indices reflecting the inflammatory response, but not with weight loss. *David B. Gough, Kenneth C. Fearon & David C. Carter* 182A
Continuous enteral feeding impairs gallbladder contractility in newborn infants. *G. Jawaheer, N. J. Shaw, D. A. Lloyd & A. Pierro* 183A
Malnutrition in a Scottish children's hospital. *W. H. Hendrikse, J. J. Reilly & L. T. Weaver* 184A
An open prospective randomized comparison of a newly available high-energy enteral feed, with a conventional formula designed for children 1–6 years. *Bridget Lambert, Anita Macdonald & Ian W. Booth* 185A
Can nurses identify nutritionally depleted elderly patients? *A. D. Carver* 186A
Nutritional assessment and status of liver transplant candidates. *Helena S. Jackson, V. Claire Wicks, Geoff Forbes & Roger Williams* 187A
Case report: the nutritional management of a man treated for head and neck cancer. *Nicky S. Gilbert & Helen F. Petley* 188A
Pumps and stands limit mobility, but sleep is uninterrupted: home enteral feeding. *D. Carter, C. Porrett, C. Wheatley, S. Foley, R. Martin, A. Micklewright, G. McHattie, J. Nightingale, L. Paul & M. Lee* 189A
Development of a nutritional assessment tool, highlighting practical considerations. *Katrina Hamilton & Jayne Reeves* 190A
A comparison of pre-operative percutaneous endoscopic gastrostomy feeding with standard management in patients undergoing major head and neck surgery for cancer. *E. Woolley, J. Humphreys, J. Edington & M. Lombard* 191A
Nutritional problems following stroke: assessment and clinical implications. *Susan M. McLaren, John W. T. Dickerson & John Wright* 192A
Home gastrostomy feeding in children and the role of a nutrition nurse. *Gillian Abel, Susan Hampshaw, Mark D. Stringer, John M. Beck & John W. L. Puntis* 193A
Small but all that's needed. 9Ch Freka percutaneous endoscopic gastrostomies (PEG) may last 2 years. *B. L. Litchfield, J. M. D. Nightingale & B. J. Rathbone* 194A
A caterers' perception of feeding patients in hospital. *P. C. McGlone, J. W. T. Dickerson & G. J. Davies* 195A
The oxygen content of parenteral nutrition admixtures prepared by different methods. *Patrick A. Ball & Michael I. Barnett* 196A
A simplified method for compounding glutamine-enriched total parenteral nutrition (TPN) mixtures. *Gil Hardy, David Wiggins, Edward Holt & Tim Sizer* 197A
Assessment of compatibility of a Paediatric Trace Element injection in a range of total parenteral nutrition mixtures. *L. Hinchliffe, M. C. Allwood, G. Hardy & A. Nunn* 198A
Nutrition assessment and management of liver transplant patients. *O. Brady, C. Corish, S. Sugrue & J. Hegarty* 199A
Overnight percutaneous endoscopic gastrostomy (PEG) feeding using an elemental formula in adolescents and adults with cystic fibrosis. *F. Ashworth, A. McAlweenie, S. Williams, M. Hodson, S. Poole & D. Westaby* 200A
Cross-contamination of enteral feeding systems via the luer connector: a preliminary study. *A. McKillop-Smith, A. Anderton, J. McKinlay & L. McRobbie* 201A

Knowledge of nutritional assessment and support within a teaching hospital. *Jayne Reeves & Jeremy M. D. Nightingale* 202A
Gastrostomy feeding: a consumer survey by the LITRE working party. *A. Micklewright, D. Carter, G. McHattie, J. Nightingale, S. Foley, R. Martin, C. Wheatley & M. Lee* 203A

2–5 August 1994

Food photographs improve estimates of nutrient intake in dietary surveys. *M. Nelson, M. Atkinson & S. Darbyshire* 205A
Total energy expenditure, basal metabolic rate and activity plus thermogenesis before and after elective vertical band gastroplasty in obese females *N. J. Fuller, W. A. Coward, M. B. Sawyer & M. Elia* 206A

6–8 December 1994

A prospective evaluation of central venous blood flow using Doppler ultrasound in patients with long-term central venous catheters. *N. Williams, A. Bradley, D. Leinhardt, H. Mamtora & M. H. Irving* 208A

17 February 1995

The requirement for protein during pregnancy. *D. J. Naismith & A. Posselt* 210A

11–14 July 1995

Nutrient sources of *trans* fatty acids in the Scottish population (1984–1986). *S. Fenton, C. Bolton-Smith & M. K. McCluskey* 212A

7 February 1996

Non-diet and diet programmes for overweight: effects on mood, lifestyle and health. *Jane Vigus & Catherine Geissler* 214A
Effect of reduced-fat and reduced-sugar food use on diet and weight status of free-living consumers. *J. I. Aaron, S. J. Gatenby, V. Jack & D. J. Mela* 215A
The effect of meal frequency and energy restriction on total energy expenditure and spontaneous activity in obese subjects in a chamber calorimeter. *M. A. Taylor & J. S. Garrow* 216A
Dietary restraint and nutrient intakes of adolescents. *C. B. Mulvihill, P. J. Rogers & G. J. Davies* 217A
Interviewees with higher body mass index were less likely to return diet diaries in a longitudinal national survey. *G. M. Price, A. A. Paul, T. J. Cole & M. E. J. Wadsworth* 218A
The influence of glycine on urea-nitrogen salvage. *T. S. Meakins & A. A. Jackson* 219A
Modulation of blood pressure by glucocorticoids in the rat. *David S. Gardner, Simon C. Langley-Evans & Alan A. Jackson* 220A
Programming of the hypothalamic-pituitary-adrenal (HPA) axis by the maternal diet in the rat. *Simon C. Langley-Evans, David S. Gardner & Alan A. Jackson* 221A
Selenium content of UK available infant formulas and estimation of the intake of bottle-fed infants. *L. H. Foster, G. J. Davies & S. Sumar* 222A
The physiological basis of dietary preferences in West Midlands behaviourally resistant house mice. *R. C. Taylor, A. G. Stephens & R. M. Sibly* 223A

Effect of *ad libitum* intake of high-carbohydrate or high-fat diet on nutrient balances. *C. Proserpi, A. Sparti, V. Di Vetta, H. Milon, Y. Schutz & E. Jéquier* 224A
Postprandial exogenous lipid oxidation in obese and normal-weight women. *A. E. Jones, J. L. Murphy & S. A. Wootton* 225A
Modulating influence of alcohol and aspirin on postprandial lipaemia and factor VIIc in male subjects. *N. Yahia & T. A. B. Sanders* 226A
Effect of different patterns of fat intake on postprandial lipaemia and factor VII coagulant activity. *N. Yahia, C. Songhurst & T. A. B. Sanders* 227A
A comparison of insulin-stimulated glucose uptake in isolated adipocytes from different fat deposits. Does glucagon-like peptide 1 enhance uptake? *Gary Frost, David Smith, Geoffrey Trew, Raul Margara & Anthony Leeds* 228A
Anthropometric characteristics of immigrants and non-immigrants in Canada. *Joceline Pomerleau & Truls Østbye* 229A
Waist:height ratio is a simple anthropometric index which is closely associated with blood pressure in middle-aged British adults. *S. R. E. Lejeune, M. A. Ashwell, B. D. Cox & M. J. Whichelow* 230A
Identifying the possible causes of maternal obesity. *Helen E. Harris, George T. Ellison, Mary Holliday & Emy Lucassen* 231A
Differences in reported macronutrient composition of the diet in overweight and lean individuals are dependent on validity of reported energy intakes. *Carolyn D. Summerbell* 232A

2/3 April 1996

Importance of the colon as a source of circulating glucagon-like peptide 1. *M. Denise Robertson, G. Livesey, Linda M. Morgan, Shelagh Hampton & J. C. Mathers* 234A
The effect of volume and glucose concentration on the gastric emptying rate of glucose solutions in man. *J. B. Leiper, J. Davidson & R. J. Maughan* 235A
The effects of alterations in dietary carbohydrate intake on the performance of prolonged high intensity exercise in well-trained individuals. *Y. P. Pitsiladis & R. J. Maughan* 236A
Peptide breakdown by rumen microorganisms is sensitive to inhibition by 1,10-phenanthroline. *R. J. Wallace & N. McKain* 237A
Comparison of two algal polysaccharides with guar gum and cellulose on bowel habit in healthy human volunteers. *Clive S. Roper, Wendy Bal & John C. Mathers* 238A
In vitro fermentation of carbohydrate by faecal bacteria of young children in Glasgow and young urban black children in Johannesburg. *C. A. Edwards, K. A. McLaughlin, H. Hassan, I. Segal, E. Vorster, H. S. Kruger & A. R. P. Walker* 239A
Movement towards a healthier diet in Tayside between 1984 and 1994. *C. Bolton-Smith, L. McKay & S. Ogston* 240A
Confectionery, biscuits, cakes and desserts *v.* fresh fruit: influence of body mass index. *W. L. Wrieden, M. K. McCluskey & C. Bolton-Smith* 241A
A preliminary comparison of the frequency of sugar intake by 8–14 year old children in Tristan da Cunha and a region of Scotland. *W. L. Wrieden, P. Longbottom, C. Southwick & T. McKean* 242A

Preferences for approaches to 'healthy eating' education among South Asian family members in Scotland. *J. P. Landman & S. Wyke* 243A
Daily and seasonal variation in phylloquinone (vitamin K_1) intake in Scotland. *R. Price, S. Fenton, M. J. Shearer & C. Bolton-Smith* 244A
Variability in intake of fats and antioxidant vitamins assessed by multiple 7-day weighed dietary records. *J. A. Payne, A. D. L. MacVean & R. A. Riemersma* 245A
Oxidized lipids in food. *R. Wilson, J. A. Payne, R. Smith, P. Wilson, M. J. Shepherd & R. A. Riemersma* 246A
The effect of feeding and weaning practice on growth and nutritional status of Glasgow boys and girls in the first year of life. *S. A. H. Savage, J. J. Reilly & J. V. G. A. Durnin* 247A
Increased fibrinogen synthesis in cancer patients: implications for nitrogen economy. *Christine Slater, Tom Preston, Donald C. McMillan, J. Stuart Falconer & Kenneth C. H. Fearon* 248A
Evaluation of the use of knee-height to estimate stature in individuals aged ≥ 75 years living in Edinburgh: implications for the determination of body mass index. *E. Bannerman, N. Chapman, S. Cowan, J. J. Reilly, T. Kirk, W. J. MacClennan & F. Pender* 249A
Are radio-opaque pellets suitable markers for upper intestinal transit studies in human volunteers? *M. Denise Robertson, G. Livesey & J. C. Mathers* 250A
Effects of carbonated beverages on eating behaviour over seven days. *Marie Reid & Richard Hammersley* 251A
Does the histamine receptor antagonist, cyproheptadine increase voluntary food intake? *Mark G. Goodwill, Neil S. Jessop & John D. Oldham* 252A
The relationship between women's birth weight and their current cardiovascular function. *Thang S. Han, Geraldine McNeill & Doris M. Campbell* 253A
Staff use and quality of anthropometric measures in a children's hospital. *M. Jane Bunting & Lawrence T. Weaver* 254A
The influence of a modified diet on the activity of the delta-6-desaturase enzyme in men. *D. M. Perkins, R. A. Riemersma, J. A. Payne & A. D. L. MacVean* 255A
